

Luschnig Lesson I – Test

PART I: Alphabet

Write out the Greek alphabet completely and in the correct order, writing the entire alphabet in capitals, then the entire alphabet in lowercase letters. (You do not need to include obsolete letters like digamma). These are worth 8 points total (4 points for each fully correct writing of the alphabet). You will lose a quarter point for missed or misplaced letters. Make sure to write legibly.

1. CAPITALS:

2. LOWERCASE:

PART II: Noun Charts

Decline and define the following words or phrases. If a noun is listed with the definite article, make sure to decline the definite article, too. Don't forget accents, and don't forget to give the English definition of the word above the table. You get 1 point for each correct form, and therefore 10 points for each fully correct chart (11 when counting your English definition). You lose **.25 points** for each incorrect accent. You only need to give the definition once, above the chart, not after each form in the chart.

PART IV. Translation

Choose 3 out of 4 sentences to translate from Greek into English. Each correct sentence is worth 6 points. Each fully mistaken word takes away 1 point from each sentence; each small mistake (like a mistranslation of case or number or person or voice) takes away 0.5 points from each sentence's score. You are welcome to scribble and write on the sentences if that is helpful to you. You may also give translations for all 4 sentences, and the most high-scoring 3 will be counted toward your grade.
